

Eglinton Crosstown LRT

Phase One	19 km	27 stops
Phase Two	14 km	16 stops

Transit City Dept. TTC, Nov 2010

Construction of the Eglinton-Scarborough Crosstown LRT

Construction begins this summer on the Black Creek Dr. shaft that will be the launch site for boring machines that will dig a 20 km tunnel. With most of the LRT buried, it's expected to draw 30 per cent more riders than the original plan that had only 11 km underground.
